

## NOVEMBER 2009

Our newest idea... why not make "photo" bookmarks AND magnetic ones?

For November - we have a new section on this website - BOOKMARKS. Please visit the link on the left, BOOKMARKS, to read about how the magnetic bookmark works, all pictures of bookmark sets, info & pricing.

Here is a photo of one of our sets:

Each magnetic bookmark is of sturdy cardstock with a small rectangle magnet attached to the inner sides of both front and back. The bookmark folds over and surrounds the edge of a page or pages (top or side), snaps in place with a firm hold by magnetizing through the page. The magnets securely hold the bookmark in place to prevent slippage – it will not fall out of your book or magazine. It has a great staying power and is a pretty addition to any book

**EXAMPLE ONLY - SHOWING INSIDE & BACK**

**place bookmark  
exactly where you left off...**
